PROFESSIONAL SUMMARY

Senior Backend Engineer with extensive experience building and maintaining enterprise systems using Java and Spring. I have worked across consulting and product environments, contributing to financial platforms, payment services, and distributed systems. My work focuses on reliable backend services, API design, and scalable architectures. Naturally curious, I continuously explore system design, AI, and emerging technologies to keep improving as an engineer.

CORE COMPETENCIES

Languages & Frameworks: Java SE/EE, Spring Framework, Hibernate/JPA, EJB, Spring

Web Services: RESTful APIs, SOAP (JAX-RS, JAX-WS)

DevOps & Tools: Git, SVN, Maven, Docker, Kubernetes (basic)

Databases: Oracle, MySQL

Testing & CI/CD: JUnit, Mockito, Continuous Integration & Deployment

Agile Practices: Scrum, Code Reviews, Documentation

PROFESSIONAL EXPERIENCE

Software Development Engineer

Lis Holding Spa, Milan – Aug 2021 to Present

- Develop and maintain backend services supporting multiple payment solutions within a distributed POS ecosystem
- Design and implement scalable payment services within a service-oriented architecture (SOA)
- Deliver new features on a biweekly release cycle as part of cross-functional Agile teams
- Guide and support external consultants by coordinating technical activities and providing development direction

Software Developer

Objectway Spa, Milan – Dec 2018 to Jul 2021

- Maintained and enhanced financial platforms using Spring and Hibernate
- Deployed containerized applications using Docker and Kubernetes
- Optimized database queries, improving app response
- Supported backend migration projects, replacing legacy systems

Software Engineer

Partec Spa, Milan – Mar 2016 to Nov 2018

- Consultant for Intesa Sanpaolo Spa on financial applications
- Developed full-stack modules (AngularJS/ExtJS + Java backend)
- Created optimized PL/SQL procedures and batch processing scripts
- Conducted integration testing with SoapUI and WebLogic

QA Engineer

Workshare Ltd, London – Mar 2015 to Feb 2016

- Designed and executed manual/automated test plans for web and desktop apps
- Utilized C#, Python, Selenium, and Robot Framework
- Collaborated closely with developers on bug tracking and release cycles

Software Developer

Fides Consulting Srl, Multiple Locations – Sep 2013 to Feb 2015

- Consultant roles for Infogroup, System Management, and Exprivia
- Built web apps and backend systems using Java (Spring, JSF, EJB)
- Delivered CMS, financial tools, and enterprise portals for clients including ENI, Intesa Sanpaolo, and Deutsche Bank

Software Developer

Edeat Srl, Naples – Sep 2012 to Jan 2013

- Developed an information portal for event management using Java EE, HTML, and MySQL

EDUCATION

Bachelor of Computer Science

Università di Napoli Federico II, Graduated Dec 2013

LANGUAGES

- Italian: Native
- English: Intermediate (B2 - Professional working proficiency)
